

WindowAdapter

ActionListener

pack.LogIn_Register.Controlador

```
graph BT; A[pack.LogIn_Register.Controlador] --> B[WindowAdapter]; A --> C[ActionListener];
```

The diagram illustrates a class hierarchy where the `pack.LogIn_Register.Controlador` class inherits from both the `WindowAdapter` and `ActionListener` interfaces. This is represented by two arrows originating from the `pack.LogIn_Register.Controlador` box and pointing upwards to the `WindowAdapter` and `ActionListener` boxes respectively.
