

JFrame

Observer

pack.Interfaz1

```
graph BT; packInterfaz1[pack.Interfaz1] --> JFrame[JFrame]; packInterfaz1 --> Observer[Observer];
```

The diagram illustrates a class hierarchy or implementation relationship. At the bottom, a box labeled 'pack.Interfaz1' has two arrows pointing upwards to boxes labeled 'JFrame' and 'Observer' at the top. This indicates that both 'JFrame' and 'Observer' implement or inherit from 'pack.Interfaz1'.
