

AbstractTableModel

TableModel

pack.BDModeloDatosTabla

```
classDiagram
    class AbstractTableModel
    class TableModel
    class packBDModeloDatosTabla["pack.BDModeloDatosTabla"]
    AbstractTableModel <|-- TableModel
    AbstractTableModel <|-- packBDModeloDatosTabla
```

The diagram illustrates a class hierarchy. At the top level, there are two classes: AbstractTableModel and TableModel. Below them, there is a third class named pack.BDModeloDatosTabla. Arrows point from TableModel and pack.BDModeloDatosTabla up to AbstractTableModel, indicating that both are subclasses of AbstractTableModel.
